POWER-CONSTRAINED SILICON VALLEY

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Data Center Real Estate Underwriting 101 | 10 MW Model & Investor Exhibits

CONTROL POINT | Where capital commitments meet controlled physical infrastructure: power, land, financing, lease credit, and paid customer demand.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Critical IT capacity	10 MW	Inputs tab	10 MW of IT load, not merely utility capacity.
Total Development Cost	$207.73m	Development tab	Land and facility, including financing; excludes GPUs.
Initial developer equity	$90.79m	Development tab	Remaining capital after modeled construction debt.
Year-one capacity rent	$27.00m	Landlord tab	100% reserved MW billable at acceptance.
Year-one NOI	$19.75m	Landlord tab	After non-power property operating costs.
Levered annualized IRR	16.81%	Monthly CF tab	Includes construction, operations and terminal sale.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

GII RESEARCH NOTE NO. 2 | MODEL CONTENTS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Find the financial model, source ledger and the question each exhibit answers

CONTROL POINT | Start with the overview, then capital costs, landlord NOI, power, tenant credit and downside liquidity.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
01 EXECUTIVE UNDERWRITING SNAPSHOT	pp. 4–5	Start	E01_Overview
02 THE UNDERWRITING ASSUMPTIONS	pp. 6–7	Inputs	E02_Inputs

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

RESEARCH NOTE NO. 2 | MODEL READER GUIDE

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

A professional underwriting model should make its assumptions easy to challenge

CONTROL POINT | Read capacity status, company data and cash conversion separately; "PASS" confirms arithmetic, not commercial certainty.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Blue input values	ASSUMPTION	Inputs	Edit the underlying Input cells, not the presentation exhibit.
Black calculation values	FORMULA	Working tabs	Calculated from source inputs and financing schedule.
Green linked exhibit values	LIVE-LINK	E01–E17	Investor-view metrics are referenced from original model cells.
US$ millions	US$mm	All relevant tabs	Amounts above $1m display in millions unless otherwise stated.
Critical IT capacity	10 MW	Inputs tab	Not gross utility service demand and not GPU count.
Base financial case	HYPOTHETICAL	Model	Not a GMI Cloud real estate project or company forecast.
CoreWeave / Nebius	PUBLIC ISSUER	CoreWeave filing	Historical issuer numbers do not establish tenant guarantees.
Power / rent / credit	OPEN DILIGENCE	Research	Utility contracts, leases, bids and tenant support are not collected.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

01 | EXECUTIVE UNDERWRITING SNAPSHOT

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

How is the illustrative 10 MW project capitalized and valued?

CONTROL POINT | The investment return starts with a deliverable property, enforceable rent and an explicit financing waterfall.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Critical IT capacity	10.0 MW	Start tab	
TOTAL DEVELOPMENT COST	**$207.73m**	**Start tab**	
Developer equity	$90.79m	Start tab	
Debt principal	$116.94m	Start tab	
Year-1 capacity rent	$27.00m	Start tab	
Year-1 electricity	$16.10m	Start tab	
Year-1 cash to equity	**$10.56m**	**Start tab**	
Development Yield — incl. finance	**9.51%**	**Start tab**	
NOI debt coverage	2.41x	Start tab	
After-reserve debt coverage	2.29x	Start tab	
Year-1 cash-on-cash	11.64%	Start tab	
Unlevered annualized IRR	12.52%	Start tab	
Levered annualized IRR	16.81%	Start tab	
Equity cash multiple	3.93x	Start tab	

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 01 | EXECUTIVE UNDERWRITING SNAPSHOT

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

How is the illustrative 10 MW project capitalized and valued?

CONTROL POINT | The investment return starts with a deliverable property, enforceable rent and an explicit financing waterfall.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
THE 10 MW CASE | INVESTMENT AT A GLANCE			
Critical IT capacity	10 MW	Start tab	Deliverable IT load; utility commitment must be verified.
TOTAL DEVELOPMENT COST	**$207.73m**	**Start tab**	**Land, facility and construction finance; no GPUs.**
Developer equity	$90.79m	Start tab	Required cash/equity under the modeled funding.
Construction/operating debt	$116.94m	Start tab	Interest-only operations assumption.
Year-one reserved-capacity rent	$27.00m	Start tab	Rental income before property operating costs.
Year-one electricity pass-through	$16.10m	Start tab	Reimbursed at cost; not landlord margin.
Year-one property NOI	$19.75m	Start tab	Rent less non-power property operating costs.
Year-one cash to equity	**$10.56m**	**Start tab**	**After reserve and interest; before taxes.**
INVESTMENT RESULTS | ILLUSTRATIVE, NOT A QUOTATION			
Development Yield (Year 1)	**9.51%**	**Start tab**	**Stabilized Year-1 NOI / full development cost.**
After-reserve coverage	2.29x	Start tab	Reserve-adjusted cash versus interest expense.
Year-one cash-on-cash	11.64%	Start tab	Based on initial developer equity.
Unlevered annualized IRR	12.52%	Start tab	Includes construction and modeled terminal sale.
Levered annualized IRR	16.81%	Start tab	Especially sensitive to debt and exit assumptions.
WHAT MATTERS BEFORE APPROVING CAPITAL			
Land title, power and permitted IT MW	REQUIRED	DILIGENCE	Independent verification required before investment.
Lease entity, guarantee and acceptance	REQUIRED	DILIGENCE	Recognizable logos are not enforceable rent support.
Exit cap, re-leasing and technology fit	REQUIRED	DILIGENCE	Terminal value is a scenario, not guaranteed liquidity.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

02 | THE UNDERWRITING ASSUMPTIONS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Which variables drive the project and which remain unverified?

CONTROL POINT | Use blue source inputs for scenarios; delivery time and power economics must be validated independently.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Critical IT capacity	10.0 MW	Inputs tab	GII case size.
Illustrative land area	6.0 acres	Inputs tab	Planning placeholder, not a parcel or engineering layout.
Land opportunity cost per acre	$8.00m	Inputs tab	GII assumption; requires appraisal or purchase contract.
Illustrative gross building area	100,000 SF	Inputs tab	Planning placeholder.
Construction duration	24 months	Inputs tab	Fixed model timeline; rebuild the schedules before changing it.
Year-1 gross capacity rent	$225.00/kW/mo	Inputs tab	GII underwriting assumption; includes non-power facility operating costs, excludes electricity.
Average IT electrical load / capacity	85.00%	Inputs tab	Electrical loading across ALL 10 MW.
Annual energy PUE assumption	1.36	Inputs tab	Illustrative site PUE.
Blended electricity benchmark	$0.159/kWh	Inputs tab	SVP CB-6 published class-average reference effective Jan 1, 2026.
Assumed lease duration	15 years	Inputs tab	Illustrative lease.
Terminal property capitalization rate	7.00%	Inputs tab	Illustrative valuation sensitivity; NOT a market appraisal.
Debt / eligible pre-financing cost	60.00%	Inputs tab	Debt finances 60% of $194.9m eligible costs.
Construction loan interest rate	8.00%	Inputs tab	Illustrative floating-equivalent simple rate; no actual lender quote.
Operating loan interest rate	7.00%	Inputs tab	Assumed same-principal conversion to 10-year interest-only debt; no refinancing fee.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 02 | THE UNDERWRITING ASSUMPTIONS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Which variables drive the project and which remain unverified?

CONTROL POINT | Use blue source inputs for scenarios; delivery time and power economics must be validated independently.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
PROPERTY AND DELIVERABILITY			
Critical IT capacity	10.0 MW	Inputs tab	Rated IT, NOT total utility draw.
Land area	6.0 acres	Inputs tab	Illustrative, no actual site selected.
Land opportunity cost per acre	$8.00m	Inputs tab	Value land even when contributed.
Gross building area	100,000 SF	Inputs tab	No universal MW-to-SF conversion.
Construction period	24 months	Inputs tab	Structural 24 months; do not edit without rebuilding.
RENT, POWER AND CAPITAL			
Capacity rent per kW-month	$225.00	Inputs tab	Non-power facility expenses included.
Reserved capacity billed	100.00%	Inputs tab	Contractual billability, not GPU utilization.
Rent escalation	2.50%	Inputs tab	Annually.
Average IT electrical loading	85.00%	Inputs tab	Electrical load, NOT billable occupancy.
Annual facility PUE	1.36	Inputs tab	Total facility energy / IT energy.
Blended electricity reference	$0.159/kWh	Inputs tab	Tariff verification required.
Assumed lease term	15 years	Inputs tab	Ten operating years held, then assumed sale.
Operating hold	10 years	Inputs tab	Structural fixed-year model.
Exit capitalization rate	7.00%	Inputs tab	Not a transactional market quotation.
Debt share of pre-financing uses	60.00%	Inputs tab	Different from debt/all-in uses.
Construction interest	8.00%	Inputs tab	Annual model assumption.
Operating interest	7.00%	Inputs tab	Interest only.
FACILITY AND CLOUD BOUNDARY			
Hard-cost contingency	10.00%	Inputs tab	Applies to facility hard costs.
GPU count: optional cloud case	4,000 GPUs	Inputs tab	Not purchased by the property landlord.
Paid GPU-hour fraction	75.00%	Inputs tab	Separate from reserved MW and electrical loading.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

03 | DEVELOPMENT COST & CAPITAL STACK

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What does the investor buy, build and finance before rent begins?

CONTROL POINT | Separate land, facility systems, construction finance and tenant-owned computing equipment.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
LAND / HARD / SOFT COST			
Land Cost	$48.00m	Development tab	Economic land value.
Base Hard Costs	$119.00m	Development tab	Before construction contingency.
Construction contingency	$11.90m	Development tab	10% of base hard costs; counted once.
HARD COSTS — INCL. CONTINGENCY	$130.90m	Development tab	Base hard costs + contingency.
Other soft costs	$16.00m	Development tab	Design, legal, lease/closing and carry.
Development finance	$12.83m	Construction tab	Origination fee + construction interest.
SOFT COSTS — INCL. FINANCE	$28.83m	Development tab	Other soft costs + development finance.
TOTAL DEVELOPMENT COST	**$207.73m**	**Development tab**	**Land + Hard Costs + Soft Costs.**
FUNDING AND RETURN			
Eligible cost — before finance	$194.90m	Development tab	Basis for the 60% loan advance.
Debt principal	$116.94m	Development tab	Funding source, not another cost.
Developer equity	$90.79m	Development tab	Funds residual cost, fee and interest.
Annual stabilized property NOI	$19.75m	Landlord tab	Year 1 proxy; full initial billability.
DEVELOPMENT YIELD — INCL. FINANCE	**9.51%**	**Development tab**	**Stabilized NOI / Total Development Cost.**
NOI / cost before finance	10.13%	Development tab	Separate comparison denominator.
Three-category cost check	-	Checks tab	Zero means cost categories reconcile.

SOURCE / BASIS | Development and Landlord tabs. Cost and yield include development finance.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 03 | DEVELOPMENT COST & CAPITAL STACK

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What does the investor buy, build and finance before rent begins?

CONTROL POINT | Separate land, facility systems, construction finance and tenant-owned computing equipment.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
LAND / HARD / SOFT COST BRIDGE			
Land Cost	$48.00m	Development	Economic land value; not zero when contributed.
Base Hard Costs	$119.00m	Development	Excludes construction contingency.
Construction contingency	$11.90m	Development	10% of base physical facility costs.
HARD COSTS — INCL. CONTINGENCY	$130.90m	Development	Base hard costs + contingency, counted once.
Other soft costs	$16.00m	Development	Design, legal, lease/closing, construction carry.
Origination fee	$1.17m	Development	Development finance; equity-funded.
Construction interest	$11.66m	Construction	Development finance; 24-month draw schedule.
SOFT COSTS — INCL. FINANCE	$28.83m	Development	Other soft costs + fee + construction interest.
TOTAL DEVELOPMENT COST	**$207.73m**	**Development**	**Land + hard incl. contingency + soft incl. finance.**
FUNDING, YIELD AND COST NORMALIZATION			
Eligible cost — before finance	$194.90m	Development	Loan advance denominator; not full cost.
Debt principal	$116.94m	Development	Funding source; 60% of eligible cost.
Developer equity	$90.79m	Development	Residual funding including fee and interest.
Debt / Total Development Cost	**56.29%**	**Development**	**Actual debt share of the full cost denominator.**
Annual stabilized property NOI	$19.75m	Landlord	Year 1 proxy: full initial billability.
Development Yield (Year 1)	**9.51%**	**Development / Landlord**	**Stabilized annual NOI / Total Development Cost.**
NOI / cost before finance	10.13%	Development / Landlord	Separate comparison; not the primary yield.
Total Development Cost / IT MW	**$20.77m**	**Development**	**Includes land and development finance.**
Total Development Cost / gross SF	**$2,077.29**	**Development**	**Not a warehouse-shell cost comparison.**
Sources less uses check	-	Development	Zero confirms funding arithmetic.
ASSET BOUNDARY | Property facility only; no tenant GPUs.			

SOURCE / BASIS | Development and Landlord tabs. Cost and yield include development finance.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

04 | DELIVERY SCHEDULE & INTEREST CARRY

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

How does the construction calendar determine the cash need?

CONTROL POINT | Power delivery, capital draws and first billable rent must be analyzed on the same calendar.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
0	$48.00m	Construction tab	Monthly construction draw; full funding timeline at left.
1	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
3	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
5	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
7	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
10	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
13	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
18	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
20	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
24	$6.12m	Construction tab	Monthly construction draw; full funding timeline at left.
TOTAL	$194.90m	Construction tab	

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 04 | DELIVERY SCHEDULE & INTEREST CARRY

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

How does the construction calendar determine the cash need?

CONTROL POINT | Power delivery, capital draws and first billable rent must be analyzed on the same calendar.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
CONSTRUCTION DRAWS | BASE-CASE FINANCING			
Month 0 | land & eligible uses	$48.00m	Construction tab	Land purchase at model start.
Month 0 | debt draw	$28.80m	Construction tab	Initial loan funding.
Month 0 | developer equity	$20.37m	Construction tab	Land and loan fee cash.
Month 1 | eligible uses	$6.12m	Construction tab	Model assumes level draws.
Month 1 | interest	$0.204m	Construction tab	Opening balance plus half current draw.
Month 6 | interest	$0.327m	Construction tab	Interest rises with outstanding debt.
Month 12 | interest	$0.474m	Construction tab	Debt increases through construction.
Month 18 | interest	$0.620m	Construction tab	Not a contractor schedule.
Month 24 | interest	$0.767m	Construction tab	Final build-month interest.
TOTALS | SOURCE CHECK			
Total eligible uses	$194.90m	Construction tab	Reconciles to Development tab.
Total loan draws	$116.94m	Construction tab	Reconciles to Development tab.
Total interest expense	$11.66m	Construction tab	Reconciles to Development tab.
Loan origination fee	$1.17m	Construction tab	Equity funded.
Total developer equity	$90.79m	Construction tab	Reconciles to Development tab.
End-of-construction principal	$116.94m	Construction tab	Repayment at assumed exit.
CONTROL POINT: COMMISSIONING			
Base interest — cross-reference	$11.66m	Construction tab	Repeats base construction interest; not extra delay.
Eligible cost — cross-reference	$194.90m	Construction tab	Repeats pre-finance cost; not an added use.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

05 | LANDLORD CASH FLOW & NOI

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

How does reserved capacity become operating income and equity cash?

CONTROL POINT | Power recovered at cost is cash throughput, not incremental NOI.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Billable critical IT capacity (MW)	10.0 MW	Landlord tab	10 MW assumed fully billable; see the annual lease schedule.
Capacity rent ($/kW/month)	$225.00/kW/mo	Landlord tab	10 MW assumed fully billable; see the annual lease schedule.
Contractual capacity rent	$27.00m	Landlord tab	10 MW assumed fully billable; see the annual lease schedule.
Electricity reimbursement	$16.10m	Landlord tab	Utility power is reimbursed; no landlord energy markup assumed.
Total cash receipts	$43.10m	Landlord tab	Illustrative landlord cash-flow line; ten-year schedule at left.
Electricity expense	($16.10m)	Landlord tab	Utility power is reimbursed; no landlord energy markup assumed.
Total operating expenses	($23.35m)	Landlord tab	Property-level operating cost; year-by-year detail at left.
NET OPERATING INCOME	**$19.75m**	**Landlord tab**	**Illustrative landlord cash-flow line; ten-year schedule at left.**
Recurring facility capital reserve	($1.00m)	Landlord tab	Property-level operating cost; year-by-year detail at left.
Cash available before debt service	$18.75m	Landlord tab	Illustrative landlord cash-flow line; ten-year schedule at left.
Interest-only debt service	($8.19m)	Landlord tab	Modeled interest-only payments; financing terms are assumptions.
CASH FLOW TO EQUITY	$10.56m	Landlord tab	Illustrative landlord cash-flow line; ten-year schedule at left.
After-reserve debt-service coverage	2.29x	Landlord tab	Property-level operating cost; year-by-year detail at left.
Development Yield (NOI / Total Development Cost)	9.51%	Landlord tab	Illustrative landlord cash-flow line; ten-year schedule at left.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 05 | LANDLORD CASH FLOW & NOI

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

How does reserved capacity become operating income and equity cash?

CONTROL POINT | Power recovered at cost is cash throughput, not incremental NOI.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
YEAR-ONE PROPERTY ECONOMICS			
Reserved critical IT capacity	10.0 MW	Landlord tab	Fully billable in the base case.
Capacity rent per kW per month	$225.00/kW/mo	Landlord tab	Includes non-power OPEX in the model.
Contractual capacity rent	$27.00m	Landlord tab	Actual signed lease would be required.
Electricity reimbursement	$16.10m	Landlord tab	Assumed recovered at cost.
Total cash receipts	$43.10m	Landlord tab	NOT all high-margin rental revenue.
Electricity expense	($16.10m)	Landlord tab	Matches reimbursement in base case.
Total property operating expenses	($23.35m)	Landlord tab	Includes power; negative cash line.
NET OPERATING INCOME	**$19.75m**	**Landlord tab**	**Before capital reserve and debt.**
Facility capital reserve	($1.00m)	Landlord tab	Below NOI in this model.
After-reserve cash	$18.75m	Landlord tab	Funds interest under assumed debt.
Interest-only debt service	($8.19m)	Landlord tab	No amortization in this scenario.
CASH TO EQUITY	**$10.56m**	**Landlord tab**	**Assumes full collections; before income tax.**
RISK, CREDIT AND EXIT			
NOI debt coverage	2.41x	Landlord tab	NOI divided by interest.
After-reserve coverage	2.29x	Landlord tab	After-reserve cash divided by interest.
NOI / development cost	**9.51%**	**Landlord tab**	**Year-1 NOI / Total Development Cost.**
Cash-on-cash on equity	11.64%	Landlord tab	Year-one equity payout ratio.
Tenant rent + electricity bill	$43.10m	Landlord tab	Tenant pays utility in addition to rent.
Year 10 rent	$33.72m	Landlord tab	Remaining term matters at exit.
Year 10 NOI	$24.26m	Landlord tab	Feeds year-11 exit approach.
Net equity sale proceeds	$230.52m	Landlord tab	Highly exit-cap dependent.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

06 | ELECTRICITY & CAPACITY ECONOMICS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What does 10 MW mean for annual energy usage and expense?

CONTROL POINT | 10 MW IT capacity is not 10 MW of total utility service; loading and PUE determine annual energy.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Rated IT capacity	10,000 kW	Power tab	Maximum IT service capacity in the example
Average electrical loading	85.00%	Power tab	Average IT draw / rated IT capacity
Average IT power	8,500 kW	Power tab	10,000 × 85% = 8,500 kW
Hours in model year	8,760 hours	Power tab	365 × 24
Annual IT energy	74,460,000 kWh	Power tab	Power × hours
Annual energy PUE	1.36	Power tab	Total facility energy / IT energy
Facility-support energy	26,805,600 kWh	Power tab	Overhead above IT energy
All-in blended price benchmark	$0.159/kWh	Power tab	Class-average reference, not a tariff simulation
Electricity attributed to IT equipment	$11.84m	Power tab	Computing-side portion of bill
TOTAL ANNUAL ELECTRICITY	$16.10m	Power tab	Cost passed through to tenant at no markup
Average whole-facility draw	11.56 MW	Power tab	85% average loading × 1.36 PUE
IT share of total facility energy	73.53%	Power tab	PUE is not itself an efficiency percentage
Annual power / reserved kW / month	$134.18	Power tab	Comparable unit, but this is energy expense, not rent
Cost of a $0.01/kWh rate increase	$1.01m	Power tab	

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 06 | ELECTRICITY & CAPACITY ECONOMICS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What does 10 MW mean for annual energy usage and expense?

CONTROL POINT | 10 MW IT capacity is not 10 MW of total utility service; loading and PUE determine annual energy.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
FROM MEGAWATTS TO THE ELECTRICITY BILL			
Critical IT load	10,000 kW	Power tab	10 MW × 1,000 kW.
Average IT electrical loading	85.00%	Power tab	NOT lease occupancy or paid GPU utilization.
Average IT power draw	8,500 kW	Power tab	Rated kW × average loading.
Hours in model year	8,760 hours	Power tab	Non-leap year.
Annual IT energy	74,460.0 MWh	Power tab	IT kW × loading × 8,760 hours.
Annual PUE	1.36	Power tab	Total facility energy / IT energy.
TOTAL FACILITY ENERGY	101,265.6 MWh	Power tab	Includes cooling and electrical losses.
Facility-support energy	26,805.6 MWh	Power tab	Overhead—not saleable compute.
Blended energy price	$0.159/kWh	Power tab	SVP benchmark; tariff-specific billing may differ.
TOTAL ELECTRICITY COST	$16.10m	Power tab	Electricity reimbursed by modeled tenant.
Monthly equivalent	$1.34m	Power tab	Annual / 12.
Average whole-facility draw	11.56 MW	Power tab	Energy-weighted annual average.
Indicative full-load facility draw	13.60 MW	Power tab	Not engineering connection sizing.
SENSITIVITY | DO NOT CONFUSE USAGE WITH RENT			
50% electrical loading | annual cost	$9.47m	Power tab	Rent unchanged under assumed lease.
85% loading | annual cost	$16.10m	Power tab	Base-case figure.
100% loading | annual cost	$18.94m	Power tab	Actual PUE may change with loading.
Annual cost of +$0.01/kWh	$1.01m	Power tab	Pass-through still affects tenant credit.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

07 | PROPERTY VERSUS GPU CLOUD

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What changes when the same owner also finances computing equipment?

CONTROL POINT | Property rent and cloud sales are different businesses; internal rent cancels on consolidation.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Property development before financing	$194.90m	Integrated tab	Land + commissioned facility
Property financing costs	$12.83m	Integrated tab	Scenario carries developer financing assumptions
Total property capital uses	$207.73m	Integrated tab	Not equivalent to equity invested
Installed GPU-server fleet	$200.00m	Integrated tab	4,000 illustrative GPUs × $50,000 allocated installed server cost
Cluster networking and storage	$25.00m	Integrated tab	Excludes building fiber pathways already in facility budget
Total IT equipment capital	$225.00m	Integrated tab	Entire fleet must be capacity-checked by engineers
TOTAL INTEGRATED CAPITAL USES	$442.73m	Integrated tab	Does not specify funding for IT equipment
Hours per year	8,760	Integrated tab	hours
Annual revenue-producing GPU-hours	26,280,000	Integrated tab	GPU-hours
External compute revenue	$105.12m	Integrated tab	
Electricity	($16.10m)	Integrated tab	
Cloud staff / software / overhead	($10.00m)	Integrated tab	
CASH EBITDA BEFORE FINANCING	$49.02m	Integrated tab	EBITDA is not property NOI, net income or cash available to shareholders.
After IT renewal allowance	$4.02m	Integrated tab	Not EBIT: property depreciation and other accounting items have not been deducted.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 07 | PROPERTY VERSUS GPU CLOUD

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What changes when the same owner also finances computing equipment?

CONTROL POINT | Property rent and cloud sales are different businesses; internal rent cancels on consolidation.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
LANDLORD VS. VERTICALLY INTEGRATED CLOUD			
Property development + financing	$207.73m	Integrated tab	Real estate and permanent facility systems.
GPU-server fleet	$200.00m	Integrated tab	Optional cloud capital, NOT landlord property.
Network and storage	$25.00m	Integrated tab	Separate from landlord fiber pathways.
Working capital	$10.00m	Integrated tab	Cloud operating business.
TOTAL COMBINED INITIAL CAPITAL	$442.73m	Integrated tab	Property + technology + working capital.
REVENUE FROM PAID COMPUTING			
Installed GPUs	4,000	Integrated tab	Illustrative hardware count.
Paid utilization	75.00%	Integrated tab	NOT electrical loading.
Paid GPU hours / year	26,280,000	Integrated tab	Equipment × annual hours × paid utilization.
Price per paid GPU-hour	$4.00/GPU-hour	Integrated tab	No actual GMI quotation implied.
EXTERNAL COMPUTE REVENUE	$105.12m	Integrated tab	Only money from customers.
OWNING PROPERTY VERSUS LEASING			
Compute EBITDA | tenant leasing	$49.02m	Integrated tab	External revenue after tenant cash operating costs.
Combined EBITDA | integrated owner	$68.77m	Integrated tab	Eliminates internal rent at group level.
IT renewal allowance	($45.00m)	Integrated tab	Simplified renewal-cycle assumption.
Integrated after-renewal allowance	$23.77m	Integrated tab	Still before certain financing and taxes.
Integrated cash after real-estate debt	$14.58m	Integrated tab	Not complete free cash flow.
Integrated operating break-even per GPU-hour	$3.10/GPU-hour	Integrated tab	Includes modeled technology renewal.
Tenant break-even per GPU-hour	$3.85/GPU-hour	Integrated tab	Case-specific contractual allocation.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

08 | PROPERTY-RETURN SENSITIVITIES

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Which rent, Total Development Cost and exit assumptions change the case?

CONTROL POINT | Stress independently: capital cost, rent, valuation and financing. Do not report scenario values as forecasts.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Rent $175/kW/mo — annual NOI	$13.75m	Sensitivity tab	Annual NOI under alternate contractual capacity rent.
Rent $200/kW/mo — annual NOI	$16.75m	Sensitivity tab	Annual NOI under alternate contractual capacity rent.
Rent $225/kW/mo — annual NOI	$19.75m	Sensitivity tab	Annual NOI under alternate contractual capacity rent.
All-in cost $180m — NOI yield	7.64%	Sensitivity tab	Illustrative property yield with an alternative cost basis.
All-in cost $220m — NOI yield	6.25%	Sensitivity tab	Illustrative property yield with an alternative cost basis.
All-in cost $260m — NOI yield	5.29%	Sensitivity tab	Illustrative property yield with an alternative cost basis.
12-month delay — added equity	$9.36m	Sensitivity tab	Extra construction interest; not foregone rent.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 08 | PROPERTY-RETURN SENSITIVITIES

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Which rent, development-cost and exit assumptions change the property case? Independent screens, not a stressed IRR.

CONTROL POINT | Stress independently: capital cost, rent, valuation and financing. Do not report scenario values as forecasts.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
RENT PRICING | OPERATING PROPERTY YIELD			
Rent $175 | NOI	$13.75m	Sensitivity tab	No different lease costs assumed.
Rent $200 | NOI	$16.75m	Sensitivity tab	Fixed non-power OPEX in sensitivity.
Rent $225 | NOI BASE	$19.75m	Sensitivity tab	Base investment case.
Rent $250 | NOI	$22.75m	Sensitivity tab	Requires comparable market evidence.
Rent $275 | NOI	$25.75m	Sensitivity tab	Not guaranteed achievable.
DEVELOPMENT DELAY | EXTRA DEBT INTEREST			
6-month delay interest	$4.68m	Sensitivity tab	Debt fully drawn, no rent during delay.
12-month delay interest	$9.36m	Sensitivity tab	Additional equity funding necessary.
24-month delay interest	$18.71m	Sensitivity tab	Excludes some non-interest carry.
CAP RATE | EFFECT ON EQUITY SALE PROCEEDS			
Exit 6% cap | net equity sale	$288.44m	Sensitivity tab	Lower cap implies higher sale valuation.
Exit 7% cap | net equity sale	$230.52m	Sensitivity tab	Base scenario.
Exit 8% cap | net equity sale	$187.09m	Sensitivity tab	Stress case.
Exit 9% cap | net equity sale	$153.31m	Sensitivity tab	More conservative terminal exit.
INVESTOR USE			
Base-case NOI | context only	$19.75m	Landlord tab	Run each case separately; no scenario IRR in tab.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

09 | EVIDENCE & SOURCING LEDGER

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Which claims are sourced, assumed, or not yet established?

CONTROL POINT | A source only supports a claim when its date, unit, geography and scope match the model.

MEASURE / INVESTMENT QUESTION	VALUE / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
S01 SVP electricity reference	SOURCE	Research tab	CB-6 class-average $0.159/kWh; individual demand/energy and surcharges matter.
S02 Silicon Valley market context	SOURCE	Research tab	509.2 MW inventory; 4.2% vacancy; 22 MW H1 absorption; 144 MW construction; asking rents…
S03 PUE definition	SOURCE	Research tab	Google explains total-facility and IT-energy measurement boundaries.
S04 Power pass-through example	SOURCE	Research tab	Core Scientific reports electricity reimbursement without markup.
S05 Capacity-status example	SOURCE	Research tab	Core Scientific filing distinguishes leased and billed customer power.
S06 GMI business description	SOURCE	Research tab	Company describes a computing and inference technology platform.
S07 Rack-density reference	SOURCE	Research tab	DGX GB rack guide describes approximately 120 kW for the specified rack system.
S08 CBRE national universe	SOURCE	Research tab	10,903 MW operating; 7,481.1 MW construction; 1.4% vacancy; 80.4% preleased.
S09 CBRE local market inventory	SOURCE	Research tab	Market-level inventory and available capacity for eight primary markets.
S10 JLL broader market	SOURCE	Research tab	More than 66 GW under construction; 1% vacancy in its market coverage.
S11 CoreWeave financial filing	SOURCE	Research tab	Balance sheet, lease liabilities and noncommenced commitments.
S12 Nebius financial filing	SOURCE	Research tab	Balance sheet; 1,510.4m operating lease liability shown in non-current section.
S13 Nebius–Meta contract	SOURCE	Research tab	Conditional unsold-capacity order up to $15bn; five-year orders; delivery terms.
S14 GMI financing announcement	SOURCE	Research tab	$223m Series B equity + $445m CTBC-led credit facility = $668m announced.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 09 | EVIDENCE & SOURCING LEDGER

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Which claims are sourced, assumed, or not yet established?

CONTROL POINT | A source only supports a claim when its date, unit, geography and scope match the model.

MEASURE / INVESTMENT QUESTION	VALUE / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
PUBLISHED EVIDENCE | SELECT PRIMARY SOURCES			
SVP power rate	SOURCE	Silicon Valley Power	Class-average rate is not an executed tariff.
CBRE Silicon Valley	SOURCE	CBRE Silicon Valley	Inventory, vacancy and rents need scope/date.
Power pass-through precedent	SOURCE	Core Scientific filing	Disclosed lease structure, not GMI's lease.
Rack density	SOURCE	NVIDIA hardware guide	Architecture-specific, not a universal MW/SF.
CBRE primary markets	SOURCE	CBRE H1 2026	Reported universe differs from JLL's.
JLL North America	SOURCE	JLL midyear 2026	Broader construction universe; cannot sum to CBRE.
CoreWeave filings	SOURCE	CoreWeave filing	Issuer balance sheet ≠ tenant-entity guarantee.
Nebius filings	SOURCE	Nebius results	Reconcile current and non-current leases.
GMI financing release	SOURCE	GMI financing release	Equity + facility ≠ cash available to landlord.
REQUIRED DILIGENCE | NOT YET COLLECTED			
Land/title, appraisal, easements	REQUIRED	Research tab	Acquire independent parcel evidence.
Executed power/interconnection	REQUIRED	Research tab	Confirm firm MW, date, cost and curtailment.
Cooling, redundancy, commissioning	REQUIRED	Research tab	Engineer verifies IT MW delivery boundary.
Matched construction bids	REQUIRED	Research tab	Test the construction allowances.
Lease, obligor, remedies	REQUIRED	Research tab	Underwrite the actual tenant and guarantee.
Creditor liens and credit support	REQUIRED	Research tab	Avoid treating customer logo as surety.
Exit/re-leasing and retrofits	REQUIRED	Research tab	Model residual property adaptability.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

10 | MONTHLY CASH FLOW & RETURNS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Selected monthly equity funding, operating distributions and terminal proceeds; full schedules remain in the working table.

CONTROL POINT | Transaction timing matters: a delayed acceptance date can change returns even without a cost overrun.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Month 0 | Build	($20.37m)	Monthly CF tab	Equity cash funded after loan proceeds, including build interest and fees.
Month 1 | Build	($2.65m)	Monthly CF tab	Equity cash funded after loan proceeds, including build interest and fees.
Month 5 | Build	($2.75m)	Monthly CF tab	Equity cash funded after loan proceeds, including build interest and fees.
Month 11 | Build	($2.90m)	Monthly CF tab	Equity cash funded after loan proceeds, including build interest and fees.
Month 17 | Build	($3.04m)	Monthly CF tab	Equity cash funded after loan proceeds, including build interest and fees.
Month 23 | Build	($3.19m)	Monthly CF tab	Equity cash funded after loan proceeds, including build interest and fees.
Month 59 | Operations	$0.95m	Monthly CF tab	Monthly equity distribution after reserve and operating interest.
Month 71 | Operations	$0.99m	Monthly CF tab	Monthly equity distribution after reserve and operating interest.
Month 95 | Operations	$1.07m	Monthly CF tab	Monthly equity distribution after reserve and operating interest.
Month 119 | Operations	$1.15m	Monthly CF tab	Monthly equity distribution after reserve and operating interest.
Month 144 | Exit + operations	$231.76m	Monthly CF tab	Net sale proceeds plus final monthly operating distribution.
Annualized unlevered IRR	12.52%	Monthly CF tab	Calculated project return; excludes financing cash flows.
Annualized levered IRR	16.81%	Monthly CF tab	Calculated equity return; includes funding, operations and exit.
Equity cash multiple	3.93x	Monthly CF tab	Total modeled equity receipts divided by equity funded.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 10 | MONTHLY CASH FLOW & RETURNS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Which months absorb equity and when does investment capital come back?

CONTROL POINT | Transaction timing matters: a delayed acceptance date can change returns even without a cost overrun.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
MONTHLY UNDERWRITING | PRINT SUMMARY			
Build period (months)	24 months	Inputs tab	Detailed month 0–24 remain in A:L.
Operating hold (years)	10 years	Inputs tab	Full monthly schedule remains below the print view.
Total developer equity funded during construction	$90.79m	Monthly CF tab	Reconciles to Development!D32.
Monthly CF equity funding check	-	Monthly CF tab	Must equal zero.
ANNUAL CASH TO EQUITY | SOURCE: LANDLORD			
Operating year 1	$10.56m	Landlord tab	Annual operating cash, excludes terminal sale.
Operating year 2	$10.99m	Landlord tab	Escalating contractual rent.
Operating year 3	$11.43m	Landlord tab	Assumes no rent default.
Operating year 4	$11.88m	Landlord tab	Before tax and extraordinary repairs.
Operating year 5	$12.33m	Landlord tab	Lease not yet expired.
Operating year 6	$12.80m	Landlord tab	No financing amortization.
Operating year 7	$13.27m	Landlord tab	Fully billed reserved IT load.
Operating year 8	$13.76m	Landlord tab	OPEX grows separately.
Operating year 9	$14.26m	Landlord tab	Tenant remains in modeled occupancy.
Operating year 10	$14.77m	Landlord tab	Sales proceeds accounted for separately.
DISCOUNTED RETURNS | MONTHLY SERIES			
Unlevered annualized project IRR	12.52%	Monthly CF tab	Includes construction and year-ten sale.
Levered annualized equity IRR	16.81%	Monthly CF tab	Sensitive to exit assumption.
Equity cash multiple	3.93x	Monthly CF tab	Before taxes; modeled proceeds.
Year-10 sale proceeds	$230.52m	Landlord tab	Terminal cash after sale costs and loan payoff.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

11 | MARKET SIZE & COMPETITIVE SUPPLY

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What do MW inventories, vacancy and pipelines actually describe?

CONTROL POINT | Do not combine non-comparable CBRE, JLL and developer pipeline measurements.

MEASURE / INVESTMENT QUESTION	VALUE / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Northern Virginia | operating MW	4,496.5 MW	Market tab	Available 10.8 MW; vacancy 0.2%.
Silicon Valley | operating MW	509.2 MW	Market tab	Available 21.2 MW; vacancy 4.2%.
Phoenix | operating MW	1,069.2 MW	Market tab	Available 12.1 MW; vacancy 1.1%.
CBRE primary-market operating supply	10,903.0 MW	Market tab	Eight primary-market wholesale universe
CBRE primary-market construction	7,481.1 MW	Market tab	Pipeline, not operating inventory
CBRE construction preleased	80.40%	Market tab	Not proof of tenant solvency or power delivery
JLL North America construction	>66,000.0 MW	Market tab	Lower-bound transcription of >66 GW; coverage differs
Case / Silicon Valley inventory	1.96%	Market tab	Scale context, not a leasing probability
Case / published available MW	47.17%	Market tab	Published availability may not form one usable 10 MW block
Silicon Valley construction	144.0 MW	Market tab	Do not label every under-construction MW as available
Silicon Valley H1 net absorption	22.0 MW	Market tab	Do not silently call this an annual rate

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 11 | MARKET SIZE & COMPETITIVE SUPPLY

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What do MW inventories, vacancy and pipelines actually describe?

CONTROL POINT | Do not combine non-comparable CBRE, JLL and developer pipeline measurements.

MEASURE / INVESTMENT QUESTION	VALUE / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
THREE CBRE MARKETS | H1 2026 SNAPSHOT			
Northern Virginia inventory	4,496.5 MW	Market tab	Market inventory, NOT vacant or new capacity.
Northern Virginia available MW	10.8 MW	Market tab	Within publisher's market scope.
Silicon Valley inventory	509.2 MW	Market tab	Geography ≠ just City of Santa Clara.
Silicon Valley available MW	21.2 MW	Market tab	Different from construction MW.
Phoenix inventory	1,069.2 MW	Market tab	Compare date and definitions.
Phoenix available MW	12.1 MW	Market tab	Do not interpret as actual project demand.
NATIONAL CAPACITY | DIFFERENT REPORTING UNIVERSES			
CBRE primary-market existing supply	10,903.0 MW	Market tab	Existing supply in CBRE-defined primary markets.
CBRE primary-market construction	7,481.1 MW	Market tab	Pipeline under construction, not operating.
CBRE primary-market preleasing	80.40%	Market tab	Share within reported construction universe.
JLL North America construction	>66.0 GW	Market tab	Different source coverage; not additive.
SILICON VALLEY INVESTOR SCREEN			
Case / SV existing inventory	1.96%	Market tab	Not a market-share prediction.
Case / SV available MW	47.17%	Market tab	Availability is fragmented; cannot assume 10 MW block.
SV under construction	144.0 MW	Market tab	Commissioning dates matter.
SV recent net absorption	22.0 MW	Market tab	Reported over H1 2026.
Property-level competitive screen	REQUIRED	MISSING	Requires actual contiguous site/lease comps.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

12 | NEOCLOUD TENANT CREDIT

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

US$ millions except ratios and status; June 2026 reporting snapshot. Issuer data do not establish a particular lease guarantee.

CONTROL POINT | Consolidated issuer leverage is not the same as an enforceable guarantee from the lease obligor.

MEASURE / INVESTMENT QUESTION	COREWEAVE / STATUS	NEBIUS / STATUS	UNDERWRITING INTERPRETATION
Total assets	$77,070.0m	27,961.5	S11/S12 | Total accounting assets, not realizable collateral
Total liabilities	$72,046.0m	17,621.0	S11/S12 | Includes liabilities beyond funded debt
Total book equity	$5,024.0m	10,340.5	S11/S12 | Total equity including noncontrolling interests
Assets / equity	15.34x	2.70x	Accounting leverage; not debt/equity or default probability.
Operating leases: current	$584.0m	114.9	S12 | Nebius current operating leases: $114.9m, Q2 2026 Note 8.
Operating leases: non-current	$15,735.0m	1,510.4	S11/S12 | Matched non-current comparison
Operating leases: total	$16,319.0m	1,625.3	Current + non-current reported for both issuers; not rent recourse.
Executed leases not commenced	$35,500.0m	12,054.1	S12 | $12,054.1m future leases not commenced; undiscounted.
Pipeline share (speaker slide)	92% leased	70% owned-build	Nebius 70% owned-build; source is not an audited census.
Legal tenant and parent support	UNRESOLVED	UNRESOLVED	Establish who owes rent and which balance sheet is relevant
Customer cash conversion	UNRESOLVED	UNRESOLVED	Do not equate backlog with cash available for rent
Collateral and priority	UNRESOLVED	UNRESOLVED	Owned facilities may support secured creditors first
Meta unsold-capacity arrangement	Not a CoreWeave arrangement	PUBLICLY DISCLOSED	S13 | Nebius commercial arrangement; not a blanket property-lease guarantee.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 12 | COREWEAVE VERSUS NEBIUS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

How does a property lender assess CoreWeave versus Nebius?

CONTROL POINT | Consolidated issuer leverage is not the same as an enforceable guarantee from the lease obligor.

MEASURE / INVESTMENT QUESTION	VALUE / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
BALANCE-SHEET SNAPSHOT | JUNE 30, 2026			
CoreWeave assets	$77.07bn	Tenant Credit tab	Issuer consolidated, not project-specific.
Nebius assets	$27.96bn	Tenant Credit tab	Issuer consolidated, not project-specific.
CoreWeave total liabilities	$72.05bn	Tenant Credit tab	Includes more than funded debt.
Nebius total liabilities	$17.62bn	Tenant Credit tab	Cannot infer creditor priority.
CoreWeave book equity	$5.02bn	Tenant Credit tab	Book value, not available guarantee cash.
Nebius book equity	$10.34bn	Tenant Credit tab	Book value, not liquidation value.
CoreWeave assets / equity	15.34x	Tenant Credit tab	Accounting leverage, not default likelihood.
Nebius assets / equity	2.70x	Tenant Credit tab	Not funded debt/equity.
LEASE LIABILITIES | DO NOT COMPARE WRONG DENOMINATORS			
CoreWeave total operating leases	$16.32bn	Tenant Credit tab	Current plus non-current.
Nebius total operating leases	$1.63bn	Tenant Credit tab	Current $114.90m + non-current $1,510.40m [6].
Nebius leases not yet commenced	$12.05bn	Tenant Credit tab	Future undiscounted commitments; distinct from recognized liabilities
LANDLORD CREDIT CHECKLIST			
Exact legal tenant entity	REQUIRED	UNRESOLVED	Obtain agreement and structure chart.
Executed parent guarantee	REQUIRED	UNRESOLVED	Name and terms—not name recognition.
Committed-to-billed-to-cash bridge	REQUIRED	UNRESOLVED	Backlog is not rent cash.
Collateral and lien priorities	REQUIRED	UNRESOLVED	Owned facilities may be pledged.
Re-leasing recoverable value	REQUIRED	UNRESOLVED	Technical fit and payment priority matter.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

13 | GMI CLOUD PUBLIC FINANCING CASE

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What can a private neocloud announcement teach without claiming company support?

CONTROL POINT | Announced equity and credit facilities are not equivalent to cash available for a specific lease.

MEASURE / INVESTMENT QUESTION	VALUE / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Series B equity	$223.00m	GMI Case tab	S14 | Company-issued release dated October 1, 2026
CTBC-led credit facility	$445.00m	GMI Case tab	S14 | Borrowing capacity; drawn amount not provided
Total announced financing	$668.00m	GMI Case tab	Arithmetic sum of two different capital forms
Debt actually drawn	NOT DISCLOSED HERE	C15	$445m facility is not $445m cash or debt drawn
Rate, maturity and covenants	NOT DISCLOSED HERE	C16	Cannot reproduce financing economics
Collateral and cash restrictions	NOT DISCLOSED HERE	C17	Cash may not be available to a particular tenant entity
Contracted ARR to collected cash	NOT RECONCILED	C18	Annualized indicators are not annual revenue or cash
Guarantee of property rent	NOT ESTABLISHED	C19	Investor/customer/supplier relationships create different obligations
Different contract clocks	12–15-year facility leases;	C29	Request the actual maturity/renewal schedule; not every lease has these terms
Utilization	Paid-utilization claims	C30	Paid time, electrical loading and contractual capacity differ
Lockbox / SPV	Illustrative cash routing	C31	Speaker example only: payment order, not guaranteed GMI cash.
Regional financing	NTD financing referenced	C32	FX-hedged dollar costs and binding terms require verification.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 13 | GMI CLOUD PUBLIC FINANCING CASE

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What can a private neocloud announcement teach without claiming company support?

CONTROL POINT | Announced equity and credit facilities are not equivalent to cash available for a specific lease.

MEASURE / INVESTMENT QUESTION	VALUE / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
PUBLIC FINANCING | NOT A PROPERTY GUARANTEE			
Series B equity	$223.00m	GMI Case tab	Issuer announcement of raised equity.
CTBC-led credit facility	$445.00m	GMI Case tab	Availability and draw terms not established here.
Total announced financing	$668.00m	GMI Case tab	Equity + facility ≠ unrestricted bank cash.
Equity share of announced package	33.38%	GMI Case tab	Derived composition, not cost of capital.
Credit facility share	66.62%	GMI Case tab	Not actual outstanding debt.
Debt actually drawn	REQUIRED	NOT VERIFIED	Borrowing statement, available/undrawn amount.
Interest, maturity and covenants	REQUIRED	NOT VERIFIED	Executed financing documentation.
Collateral and payment restrictions	REQUIRED	NOT VERIFIED	Security documentation and cash waterfall.
Contracted ARR → cash collected	REQUIRED	NOT VERIFIED	Reconcile deployment, billing and collections.
Executed property rent guarantee	REQUIRED	NOT VERIFIED	Must exist at exact tenant/guarantor entity.
VALLEY101 | SPEAKER OBSERVATIONS			
Lease vs compute contract clock	SOURCE	GII Valley101 report	Attributed typical 12–15 vs 4–6 years, NOT an actual deal.
Cloud utilization	SOURCE	GII Valley101 report	Paid utilization is not landowner occupancy.
Lockbox and SPV example	SOURCE	GII Valley101 report	Speaker illustration, NOT confirmed GMI transaction.
International financing	SOURCE	GII Valley101 report	All-in FX-hedged cost required.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

14 | LEASE DOCUMENT DILIGENCE

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What must be in the lease before billable MW turn into a bankable claim?

CONTROL POINT | Deliverability, acceptance and recovery rights matter as much as contract rent.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Owned assets	MODEL / GATE	C7	Avoid paying for equipment excluded from property collateral
Capacity	MODEL / GATE	C8	Rent unit must match deliverable capacity
Rent scope	MODEL / GATE	C9	Do not add a second operating-cost recovery
Billability	MODEL / GATE	C10	Late power can delay rent without reducing debt cost
Power	MODEL / GATE	C11	Recovery timing and nonpayment can create liquidity exposure
Escalation	MODEL / GATE	C12	Different escalators change margin
Term	MODEL / GATE	C13	Only five assumed years remain at exit
Service obligations	MODEL / GATE	C14	Availability failures can reduce receipts
Counterparty	MODEL / GATE	C15	Corporate brand is not enforceable recourse
Renewal/exit	MODEL / GATE	C16	Reserve may not fund a new technology generation
Power and permits	MODEL / GATE	C27	Utility, permitting team, engineer
Budget and delivery	MODEL / GATE	C28	Developer and mission-critical contractor
Lease and credit	MODEL / GATE	C29	Commercial team, counsel, credit reviewer
Financing and exit	MODEL / GATE	C30	Lender, investment committee, appraiser

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 14 | LEASE DOCUMENT DILIGENCE

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What must be in the lease before billable MW turn into a bankable claim?

CONTROL POINT | Deliverability, acceptance and recovery rights matter as much as contract rent.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
YOUR FACILITY LEASE | KEY INSTITUTIONAL QUESTIONS			
Land and permanent facility scope	REQUIRED	Lease Screen tab	Obtain title, demarcation and equipment schedule.
10 MW IT delivery	REQUIRED	Lease Screen tab	Engineer scope and executable utility commitments.
Gross capacity rent	REQUIRED	Lease Screen tab	Confirm OPEX included; power separately billed.
Contractual billability	REQUIRED	Lease Screen tab	Acceptance, milestones, free rent and phase-in.
Electricity reimbursement	REQUIRED	Lease Screen tab	Tariff, metering, deposits and payment timing.
Rent and cost escalators	REQUIRED	Lease Screen tab	Underwrite actual signed clauses.
15-year term assumption	REQUIRED	Lease Screen tab	Five years of term assumed at sale.
Service levels and remedies	REQUIRED	Lease Screen tab	Nonperformance can cause abatement.
Legal tenant and support	REQUIRED	Lease Screen tab	Guarantee must be executed and enforceable.
Re-leasing / retrofit	REQUIRED	Lease Screen tab	Collateral and tenant equipment rights matter.
DECISION GATES			
Power and permits	REQUIRED	Lease Screen tab	PAUSE major binding capital; verify conditions.
Budget and construction	REQUIRED	Lease Screen tab	Obtain matched bids and milestone schedule.
Lease and credit	REQUIRED	Lease Screen tab	Review exact entity, payment security and remedies.
Refinancing and exit	REQUIRED	Lease Screen tab	Test loan maturity and residual occupancy.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

15 | CASH-NEED DOWNSIDE ANALYSIS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Who must supply the next dollar when power or tenant receipts slip?

CONTROL POINT | Separate incremental cash funding from revenue deferred; do not double-count lost rent.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Extra annual fixed construction carry ($)	$1.50m	Downside tab	Extends original tax/insurance carry; not full operating costs
Post-completion rent interruption (months)	3 months	Downside tab	No rent collected during the selected period
Power-recovery shortfall (months)	1 month	Downside tab	Electricity already paid but not recovered; not unlimited future usage
One-time re-leasing / retrofit cash ($)	$5.00m	Downside tab	Scenario placeholder, not an engineering quote
Refinance LTV limit	55.00%	Downside tab	Value-based borrowing limit
Refinance interest-only rate	9.00%	Downside tab	Not lender terms
Reserve and debt service during interruption	$2.30m	Downside tab	Reserve maintained; interest-only debt serviced
Unrecovered electricity already funded	$1.34m	Downside tab	A reimbursement loss, not a second capacity-rent loss
One-time re-leasing / retrofit cash	$5.00m	Downside tab	Extraordinary cash beyond annual reserve
Total additional cash requirement	$10.45m	Downside tab	No rent, guarantees or deposits recovered in this scenario
Rent not received (comparison only)	$6.75m	Downside tab	Not added to the cash-need total
Refinancing at 7.0% cap	$1.17m	Downside tab	Incremental shortfall plus funding fee; illustrative.
Refinancing at 9.0% cap	$1.17m	Downside tab	Incremental shortfall plus funding fee; illustrative.
Refinancing at 11.0% cap	$7.33m	Downside tab	Incremental shortfall plus funding fee; illustrative.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 15 | CASH-NEED DOWNSIDE ANALYSIS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Who must supply the next dollar when power or tenant receipts slip?

CONTROL POINT | Separate incremental cash funding from revenue deferred; do not double-count lost rent.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
POWER DELIVERY DELAY | REQUIRED EXTRA CASH			
6-month delay	$5.43m	Downside tab	Interest plus fixed construction carry.
12-month delay	$10.86m	Downside tab	Equity-funding scenario; not new capex budget.
24-month delay	$21.71m	Downside tab	Actual extension fees could be additional.
TENANT INTERRUPTION | CASH REQUIREMENT			
Rent-interruption assumption	3 months	Downside tab	Months without collection.
Electricity recovery delay	1 month	Downside tab	Utility bills funded but unrecovered.
Re-leasing/retrofit assumption	$5.00m	Downside tab	Not an engineer's quotation.
Fixed property cost during gap	$1.81m	Downside tab	Cannot turn all expenses off.
Debt service + reserve during gap	$2.30m	Downside tab	Contractual debt clock keeps running.
Unrecovered power cash	$1.34m	Downside tab	Cash timing/collection exposure.
Re-leasing/retrofit costs	$5.00m	Downside tab	Illustrative one-time bill.
TOTAL ADDITIONAL CASH NEEDED	$10.45m	Downside tab	Separate from forfeited rent comparison.
REFINANCE SCREEN | END OF YEAR FIVE			
7% appraisal cap | new debt capacity	$155.44m	Downside tab	Subject to both LTV and coverage.
9% appraisal cap | new debt capacity	$135.32m	Downside tab	Borrowing capacity can be constrained.
11% appraisal cap | principal gap	$6.22m	Downside tab	Additional equity funding at maturity.
11% appraisal cap | incl. fees	$7.33m	Downside tab	Debt payoff shortfall plus origination cash.

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

16 | CELL-LEVEL SOURCE TRACEABILITY

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

Can another analyst reproduce the headline results?

CONTROL POINT | Every important number should point to an editable input, working formula or dated public source.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Case capacity	10.0 MW	Trace tab	Inspect the named metric and its exact live formula in the working Trace table.
Pre-financing developer uses	$194.90m	Trace tab	Inspect the named metric and its exact live formula in the working Trace table.

17 | FINANCIAL MODEL CONTROLS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What arithmetic passed, and which risks remain outside the model?

CONTROL POINT | PASS means math ties. It does not certify power access, tenant credit, engineering or legal terms.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
Sources equal development uses	PASS	E7	Uses funded by modeled principal and equity
Construction equity = development equity	PASS	E8	Construction and summary schedules reconcile
Construction debt = loan commitment	PASS	E9	Closing debt equals funded principal
Monthly CF equity = development equity	PASS	E10	Return schedule uses the same equity funding
Power revenue = power expense	PASS	E11	Base pass-through does not inflate NOI
Integrated rent elimination	PASS	E12	Consolidated EBITDA removes internal rent
24-month construction structure	PASS	E13	Fixed monthly schedule remains aligned
Ten-year operating hold structure	PASS	E14	Fixed return horizon remains aligned
Lease covers hold	PASS	E15	Assumed lease extends through modeled sale
Billability within 0–100%	PASS	E16	Valid reserved-capacity fraction
Electrical load within 0–100%	PASS	E17	Valid average loading fraction
PUE at least 1	PASS	E18	Total facility energy not less than IT energy
Required positive economic inputs	PASS	E19	Avoid principal denominator failures
GMI components sum to total	PASS	E20	Announced capital arithmetic only

SOURCE / BASIS | GII teaching model. Use the working tab and Research bibliography for assumptions and evidence.

LIMITATION | Hypothetical property; no actual GMI lease. Long working schedules remain complete in Excel.

EXHIBIT 17 | FINANCIAL MODEL CONTROLS

GII 10MW Underwriting | MODEL COMPANION | Version 1.0

What arithmetic passed, and which risks remain outside the model?

CONTROL POINT | PASS means math ties. It does not certify power access, tenant credit, engineering or legal terms.

MEASURE / INVESTMENT QUESTION	MODEL RESULT / STATUS	MODEL TAB / SOURCE	UNDERWRITING INTERPRETATION
AUTOMATED ARITHMETIC CHECKS | MODEL COHERENCE			
Sources equal development uses	PASS	Checks tab	PASS if modeled cash sources reconcile.
Construction equity reconciliation	PASS	Checks tab	PASS if funding schedules reconcile.
Construction debt reconciliation	PASS	Checks tab	PASS if loan draws match commitment.
Monthly equity schedule reconciliation	PASS	Checks tab	PASS if equity outflows match initial equity.
Electricity pass-through balance	PASS	Checks tab	PASS if reimbursements equal modeled expense.
Integrated internal rent elimination	PASS	Checks tab	PASS if intercompany rent cancels.
24-month construction structure	PASS	Checks tab	PASS only for the fixed horizon.
10-year operating hold structure	PASS	Checks tab	PASS only for the fixed horizon.
Lease covers planned hold	PASS	Checks tab	Legal renewal rights still unexamined.
Reserved billability in range	PASS	Checks tab	Only arithmetic, not executed lease.
IT electrical loading in range	PASS	Checks tab	Only arithmetic, not operating data.
PUE at least one	PASS	Checks tab	Engineering performance not independently tested.
Required positive modeling inputs	PASS	Checks tab	Prevents obvious invalid denominators.
GMI financing totals reconcile	PASS	Checks tab	Announcement composition, not capital availability.
IMPORTANT LIMITATION			
ALL CHECKS PASS ≠ INVESTMENT APPROVAL	**REQUIRED**	**DILIGENCE**	**Power, signed lease, engineering, tenant credit unverified.**
Land + Hard + Soft reconciles	PASS	Checks tab	Classification equals TDC.
Development Yield reconciles	PASS	Checks tab	NOI / TDC equals the stated measure.
Year 1 stabilization convention	**PASS**	**Checks tab**	**Full billability is assumed, not verified.**
